Meet the family...

Introducing Our “Group” Affiliates

We at Esschem are often asked about our company’s affiliations. We are proud to be a part of a larger corporate group of inter-related companies and we’d like to take this opportunity to introduce you to each of our sister companies.

Justi Group, Inc. (JGI) is parent to a family of four affiliated businesses: Esschem, Inc., Esschem Europe Ltd, Esstech, Inc. and Specialty Glass, Inc. While their core technologies may differ, each of these companies is involved in some way in the manufacture and/or preparation of highly specialized, usually customized, raw materials for very exacting applications including dental, cosmetic, audiologic, medical and pharmaceutical. Each of the four companies shares as a common ethic a commitment to uncompromising quality standards, product and process innovation and extraordinary customer responsiveness.

Esstech, Inc.

Esstech, Inc. is a manufacturer of a full range of specialized raw materials developed for formulators of dental restorative products, including principally composites and adhesives. Formally established as an independent business unit in 1996 and located in Essington, Pennsylvania, Esstech has long been a single source for binder resins, polymerization initiators, diluent and adhesive monomers, and glass fillers. More recently, the chemists at Esstech have extended their expertise in these leading-edge technologies into demanding applications beyond restorative dentistry. For more information, please contact Dr. Allen Johnston, Esstech's President, at 1-800-245-3800 or visit www.esstechinc.com.

Each of the four companies shares as a common ethic a commitment to uncompromising quality standards, product and process innovation and extraordinary customer responsiveness.

Specialty Glass, Inc.

Specialty Glass, Inc., acquired by JGI in 1998 but founded in 1977, manufactures a wide range

of glass and glass ceramics for use principally in dental applications, but Specialty Glass's markets now extend also to include electronic, water-soluble and art applications. Specialty Glass makes its products available in various forms as needed, including: powder, frit, cullet, and injection-molded parts. Located in Oldsmar, Florida, Specialty Glass also produces glass rods in a variety of shapes and sizes, including up to one inch in diameter. As a technological innovator, Specialty Glass is pleased to work with customers to create customized products to fulfill specific needs. If you want to know more, please call Colleen Morrisette, SGI's President, at 813-855-5779 or visit www.sglass.com.

Esschem Europe Ltd

Esschem Europe Ltd. performs the sales, marketing, warehousing and distribution functions for all of JGI's U.S. affiliates throughout the European Union (EU). In addition, Esschem Europe offers its own unique line of proprietary products and services specifically for its EU customers through its on-site manufacturing and packaging facilities in Durham, England. A successor to Acrytek Ltd, Esschem Europe was formally established as a JGI subsidiary in 2000. You can reach their General Manager, Gary Shaw, by phone at 44-191-384-9484 or visit www.esschem-europe.com.

Esschem, Inc.

Esschem, Inc., now located in a state-of-the-art facility in Linwood, Pennsylvania, has been producing and developing acrylic polymers and monomers for dental applications for nearly fifty years. Over the years, Esschem's

unique expertise in its core acrylic technologies has extended its markets to include not only dental products but orthopedic bone cement, cosmetic fingernail extension products, hearing aid shells and accessory products and, most recently, microspheres and related leading-edge acrylic polymer technologies. With its acquisition of California Chemical Specialties (CCS) in 2001,

Esschem added a considerable array of new polymer and monomer formulations, gels, primers, topcoats, oils and sealers all for the artificial cosmetic nail industry.

As part of JGI, Esschem, Inc. furnishes customers with strategic advantages to access business opportunities:

- an ever-wider array of acrylic polymers and monomers,
- research in emerging technologies,
- expanded product lines,
- new markets in Europe and beyond.

Representatives at Esschem are eager to explore these opportunities and to act as a central resource for formulation, innovation, and solution. To discuss your questions, ideas or challenges, please call Beth Welsh, VP of Sales and Customer Service, at 1-800-POLYMER (765-9637). or visit www.esschem.com ■
